

AEXS

AI EXECUTIVE SUITE

The AI command layer for enterprise leadership.

AI Chief of Staff + Governance Engine + Decision Intelligence
Sold as a unified suite. Three tiers. One platform.

SEED ROUND

\$1.5M SAFE | \$8M CAP

\$32.2M

Y3 ARR

Month 12

\$257M

Implied Val.

AI CHIEF OF STAFF

Executive memory, briefings, follow-up

AI GOVERNANCE ENGINE

EU AI Act, ISO 42001, audit reports

DECISION INTELLIGENCE

Frameworks, scenario models, audit trail

EXECUTIVE MEMORY GRAPH

Persistent context across all three layers

Executives Are Flying Blind. At Scale.

Four converging failure points — each large enough to demand a dedicated tool. None of them solved.

73%

of executives report
decision overload

\$3T

in enterprise value lost
annually to poor decisions

40+

compliance frameworks
AI teams must navigate

12%

of AI projects
succeed in production

The EU AI Act is enforceable NOW.

Article 13 transparency requirements are in force as of August 2025. Non-compliance exposes companies to fines up to 7% of global annual turnover.

Three Crises. Zero Unified Solutions.

Every competitor solves one dimension. No platform addresses all three simultaneously.

EXECUTIVE OVERLOAD

- 73% of C-suite report decision fatigue
- Avg exec manages 14+ stakeholder streams
- Follow-up failure rate exceeds 60%
- No persistent memory across tools
- Briefings built manually every morning

GOVERNANCE VACUUM

- EU AI Act enforcement began Aug 2025
- ISO 42001 requires continuous documentation
- Board audit requests have no tooling
- Compliance teams lack AI-native systems
- Fines up to EUR 35M for violations

DECISION DEBT

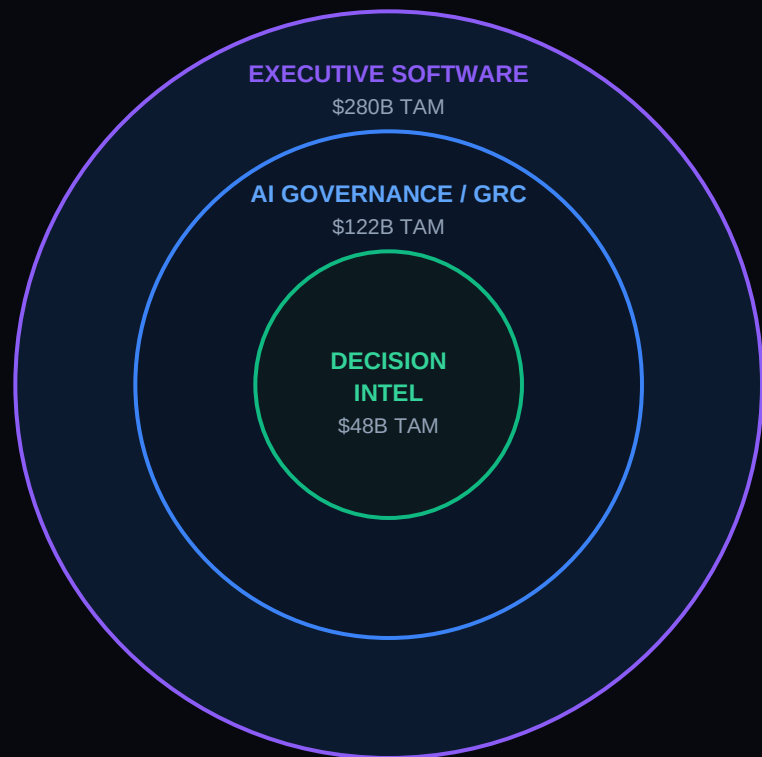

- 40+ frameworks with no unified layer
- Decisions made without structured logic
- No audit trail for strategic choices
- Scenario modeling done in spreadsheets
- 12% AI project success rate in prod

The Unified Gap:

No incumbent owns Executive Software + AI Governance + Decision Intelligence simultaneously. That is the AEXS category.

A \$450B Category Waiting to Be Created

Three adjacent markets converging under one compliance-driven forcing function.

\$450B+

Total Addressable Market

Unified executive + governance + decision platform

\$28B

Serviceable Addressable Market

AI-ready enterprise buyers in compliance-active sectors

\$2.8B

Serviceable Obtainable Market

5-year target in EU-compliant enterprise segment

Category Creation Moment: AEXS sits at the intersection of three multi-billion markets no incumbent currently owns simultaneously.

One Platform. Three Layers. Zero Compromise.

Each module delivers immediate value. Together they create a compounding moat.

CHIEF OF STAFF

AI Chief of Staff

- Executive memory — persistent context
- Daily briefing generation
- Meeting prep and follow-up tracking
- Stakeholder relationship mapping
- Priority queue management

\$499/mo

STARTER TIER

GOVERNANCE

AI Governance Engine

- EU AI Act Article 13 compliance
- ISO 42001 documentation engine
- Automated audit report generation
- Real-time policy monitoring
- Board-ready compliance dashboards

\$1,999/mo

PROFESSIONAL TIER

DECISION INTEL

Decision Intelligence

- Structured decision frameworks
- Multi-scenario modeling
- Full decision audit trail
- Outcome probability scoring
- Executive alignment workflows

\$8,500/mo

ENTERPRISE TIER

EXECUTIVE MEMORY GRAPH

Persistent context layer shared across all three modules — the moat that deepens with every use.

The AI Chief of Staff

Persistent executive memory. Proactive intelligence. Zero follow-up gaps.

6:55 AM

Morning Briefing

Priorities, risks, decisions due today

9:30 AM

Pre-Meeting Prep

Stakeholder map, key positions, talking points

12:00 PM

Follow-Up Sweep

Auto-log action items from morning sessions

3:00 PM

Decision Queue

Structured prompts for outstanding choices

5:00 PM

Day Synthesis

Memory commit: outcomes stored for context

2.4 hrs

Saved per executive daily

91%

Follow-up completion rate

14+

Stakeholder streams managed

100%

Context retained session-to-session

\$499 / month — **STARTER TIER** Included in every AEXS subscription. Expands with Governance and Decision tiers.

AI Governance Engine

From compliance burden to automated board-readiness. Real-time, continuous, audit-proof.

EU AI Act ALERT: Article 13 (transparency) enforcement began August 2025. Article 6 (high-risk AI) enters force February 2026.

MONITOR

Continuous AI Act Monitoring

- Real-time Article 13 compliance scan
- Automated risk classification
- Policy gap identification
- Alert engine for new requirements
- Shadow AI detection

CERTIFY

ISO 42001 Documentation

- Auto-generated policy templates
- Evidence collection workflows
- Certification readiness scoring
- Audit trail maintenance
- Version control for all documents

REPORT

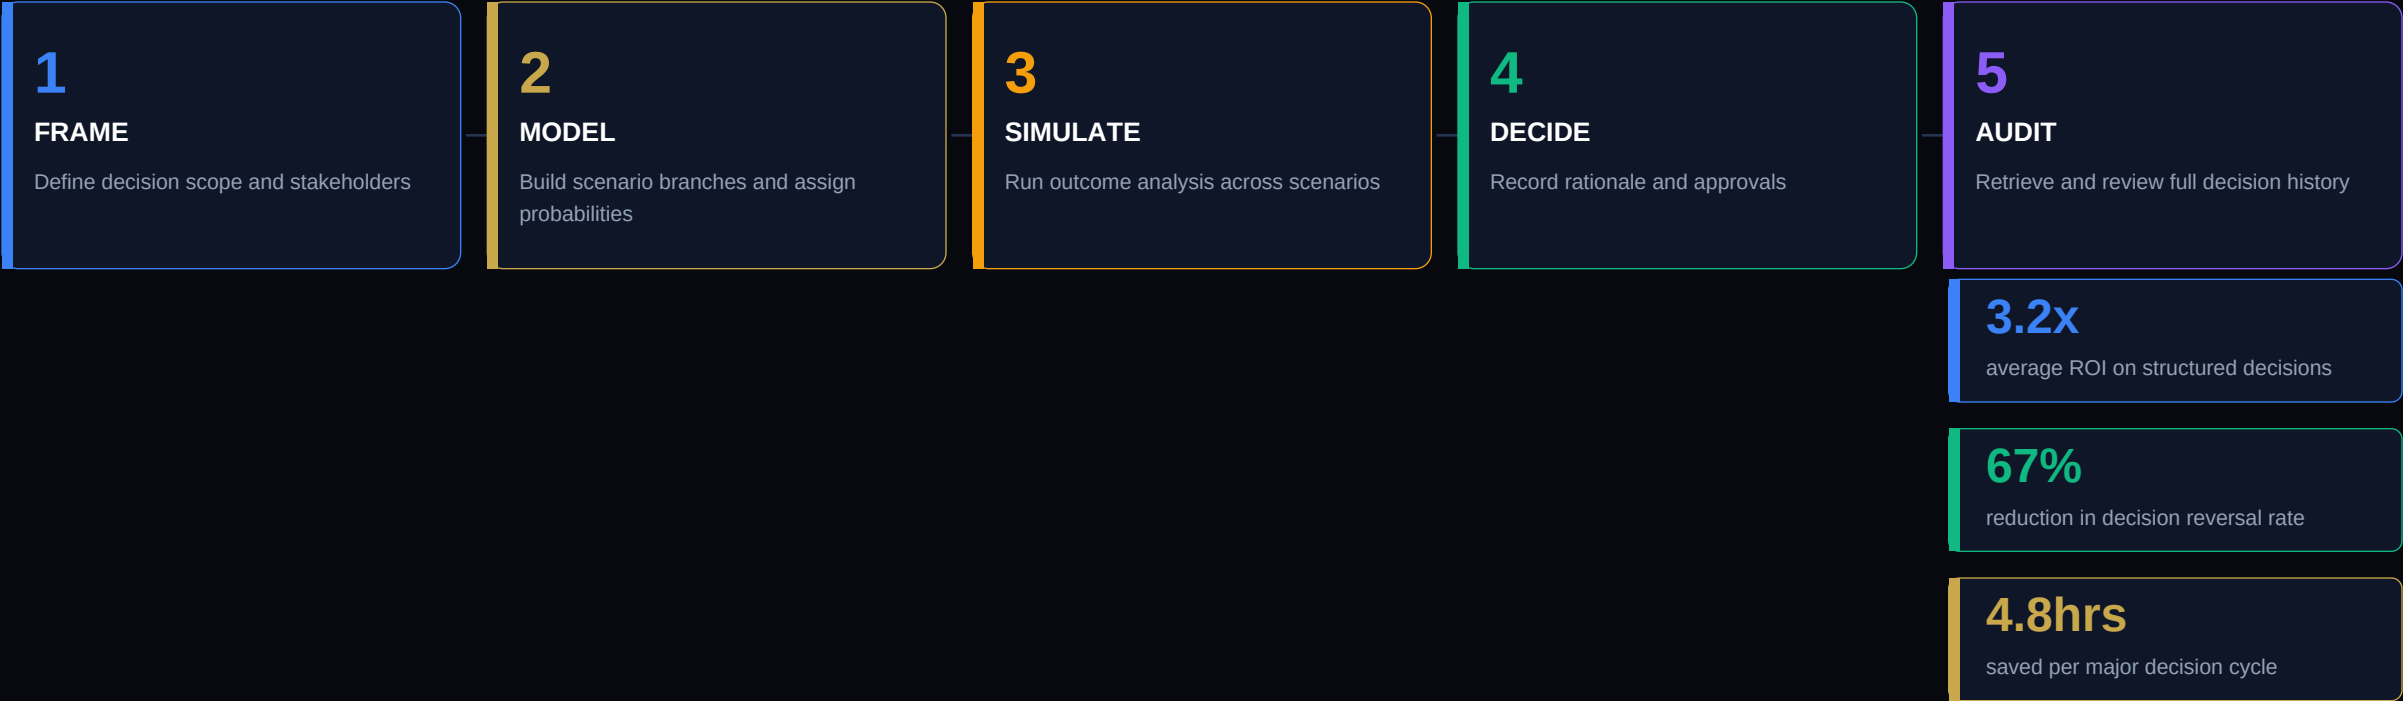

Board-Ready Audit Reports

- One-click executive summary
- Regulator-formatted output
- Risk heat maps
- Board presentation mode
- Historical compliance trend charts

Non-compliance exposure: Fines up to EUR 35M or 7% of global annual turnover — whichever is higher. No existing enterprise tool covers all Articles.

Decision Intelligence

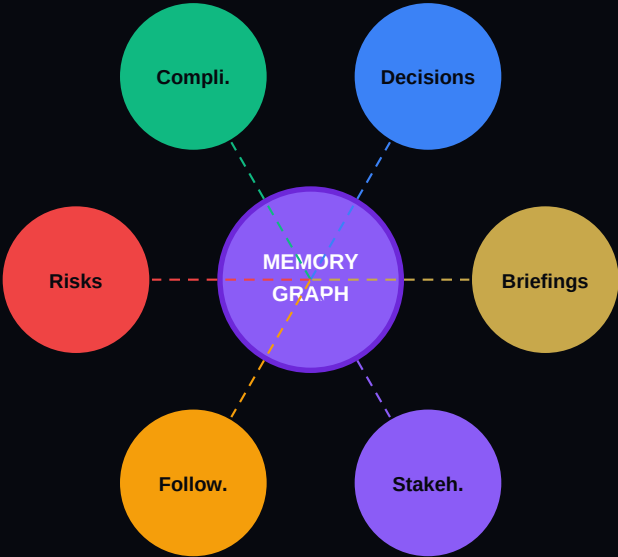

Structure. Scenario. Audit. From idea to outcome — with a full paper trail.

The Compounding Flywheel: Every decision recorded enriches the Executive Memory Graph — making Chief of Staff smarter and Governance evidence richer.

The Executive Memory Graph

The persistence layer that makes AEXS irreplaceable. Every interaction compounds the value.

Persistent Context

Memory compounds with every session — no cold starts

Cross-Module Sync

Chief of Staff briefs from Governance + Decision data

Institutional Memory

Leadership changes don't reset context — it persists

Network Effects

NRR target 130%+ as context value grows over time

Expected NRR: 130%+ Each added module deepens the memory graph — switching cost grows geometrically, not linearly.

Three Forces. One Window. 2026.

Each force alone would justify urgency. Together they define a narrow, non-recurring entry point.

REGULATORY FORCING

EU AI Act Enforcement

- Article 13 transparency in force
- High-risk AI deadline: Feb 2026
- Fines up to EUR 35M
- No tooling exists at enterprise scale
- First-mover owns procurement
- Compliance window: now

ENTERPRISE READINESS

AI Adoption Inflection

- ChatGPT drove exec AI awareness
- Boards now asking AI strategy Qs
- IT procurement cycles warming
- CFO-level ROI frameworks emerging
- Executive software budgets unlocked
- Compliance urgency = fast approval

CATEGORY VACUUM

No Unified Incumbent

- Monday.com = project management
- OneTrust = privacy (not AI Act)
- Notion = knowledge (no governance)
- No tool owns all three layers
- Category creation = price setting
- First platform wins sticky accounts

The window is not permanent. Category leaders are established in the first 18–24 months of a new compliance forcing function. AEXS is positioned to move now.

AEXS Has No Direct Competitor

Every incumbent solves one dimension. AEXS owns the intersection.

AEXS	Monday.com	OneTrust	Notion	ServiceNow	Compliance.ai
Executive Memory✓	■	■	■	■	■

Foundation Built. Momentum Loading.

Q1 2026 foundation complete. Q2 2026: MVP, pilots, first revenue.

Q1 2026 — CONFIRMED

Full engineering foundation: CI pipeline, 20 unit tests, verified financial model, investor-grade demo.

Investor Deck Live

Cinematic scrollable deck with interactive financial model — available at demo session.

Model Verified

\$32.17M Y3 ARR confirmed by Vitest-tested calcSuite(). All figures in pitch match live model.

0 Open Contradictions

6 business contradictions identified, documented, and resolved. No unresolved discrepancies.

Q1 2026

Foundation complete — repo, CI, model, deck

Apr 2026

Investor presentation materials ready

Q2 2026

MVP live — 5 beta pilots launched

Q3 2026

\$15K MRR — 20 paying beta users

Q4 2026

Series A ready — \$3M ARR

Signal from the market is clear: EU AI Act enforcement + board AI scrutiny + exec overload = three simultaneous demand drivers for AEXS.

Built by a Technical Founder Who Moves Fast

The founder is the target customer. The product solves a problem experienced firsthand.

M

Founder & CEO

AEXS — AI Executive Suite

- Enterprise AI/ML engineering — production systems at Novomatic AG
- Creator, Songwriting Lab OS — AI-native music production studio
- Austria-based — direct EU AI Act regulatory proximity

Founder Fit:

I built AEXS to solve the exact problem I faced as an executive.
